

WE CREATE FAIR 2022

THE CONCORD ROAD

May 3, 2022
Concord Road Gym

This is Not the Same Old Science Fair!

What it is:

It's a team of family members and friends who would like to share a STEM activity, craft, phenomenon or innovation with others. The weCREATE Fair is modeled around the now famous Maker Faire held all over the world and in previous years at the NY Hall of Science. At Concord Road, our goal is to encourage children's natural tendencies to be inventive and resourceful. Teams will be responsible for creating a Project Booth designed around a STEM topic. Each booth should allow visitors to experience/create/craft something new.

What it isn't:

It isn't individual projects with boards. It isn't the time to look up your favorite "experiment" and recreate it, nor is it the time to present a topic to the visitors. It is not a passive, sit-down experience. It does not include food of any kind.

ENGINEER

design	plan
create	organize
hack	construct
direct	devise
orchestrate	mastermind

K-4, ALL SCHOOL!!

Have you ever made something so amazing that you wanted to show everyone?

Are you a future engineer, a crafter, an artist, a scientist, or a tinker?

Do you DIY?

Are you a life hacker?

Then this fair is for you!

It's simple.

Make something.

Teach it.

Share it.

Create. Design. Invent. Craft. Draw.

Engineer. DO!

The possibilities are endless!

DATES

April 1: [Proposals](#) due

(only the first 40 submissions will be accepted)

May 3: weCREATE Fair

WHERE DO I BEGIN?

Project Booth Set-Up

Tuesday,
May 3rd

*All Project Booths should be set up at your designated table in the gym.

*All booths need to be disassembled at the end of the fair, and taken home. We cannot store any materials left behind.

* Each booth must have 1 or 2 adults who will remain with the booth for the entire fair.
(approx 9:00 am-2:30 pm)

* You will be provided with one 8ft table, two folding chairs, a tablecloth and a weCREATE Project Booth sign. The rest is up to you!

(only the first 40 submissions will be accepted)

To **CREATE** a successful **Project Booth**, please use the [Project Booth Planner](#) and follow ALL directions very carefully:

1. **Gather your team.** You can work with a group of friends, a few families, or members of your own family! Make sure your team has a **leader** that can communicate throughout the process with The Concord Road STEM Team.
2. **Find a STEM project that you can teach to others.** Your idea should be about playing and having fun and about sharing what you know with others. Visitors should be able to learn something amazing, create something STEM-related, and be WOWED when they visit your booth. See below for some helpful resources.
3. **Plan your booth.** Use this handy-dandy [Project Booth Planner](#) to help you design your booth. **NO FOOD MAY BE USED.** There are many ways to plan: books, websites, experts, and even many companies are willing to help. Remember to go online with a parent! See below for some helpful resources.
4. **Remember:** Make your Project Booth stand out by using color, photos, diagrams and other visuals. The most popular Project Booths are those which catch the visitor's eye!
5. **Submit a [weCREATE Proposal](#) by Friday, April 1, 2022. THIS IS A STRICT DEADLINE.** **(only the first 40 submissions will be accepted)**
