

## How to Create MP3 File Using GarageBand

1. Launch GarageBand
2. Select New Project - Choose Voice

3. To record your voice, click on the Red icon and begin speaking.

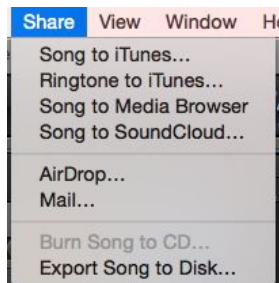

4. When you are done with your recording press the spacebar to stop.
5. To listen to your recording, rewind the playhead and press the spacebar to listen to it.

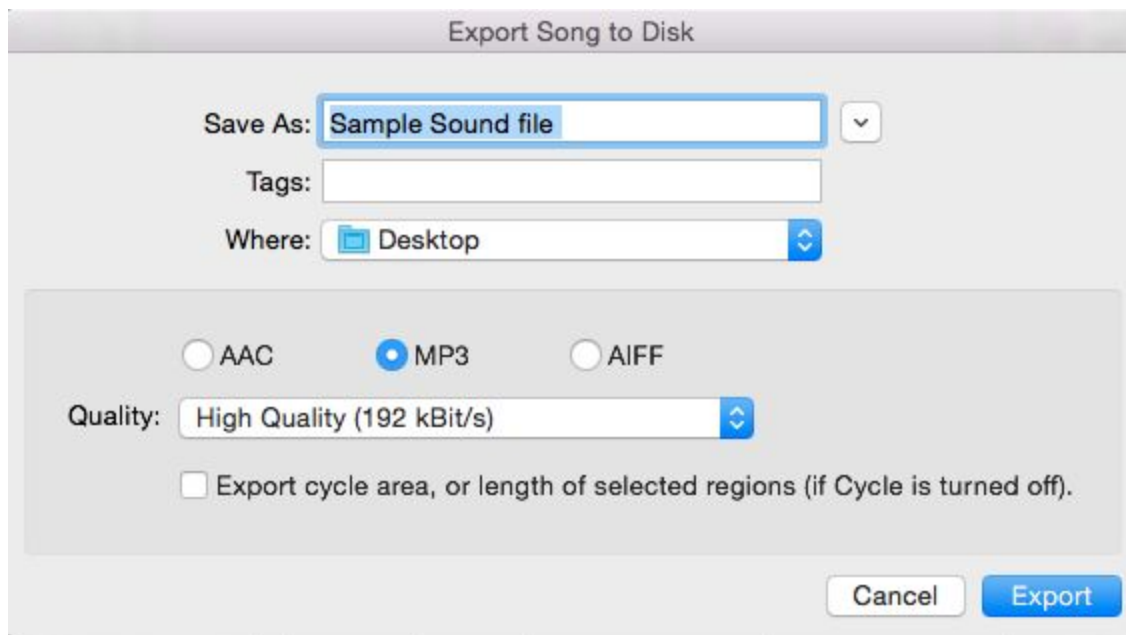

6. If you don't like the recording you can select it and press delete to remove it and you can start over. If you are happy with the recording you can move on to step 7.

7. Click Share - Export Song to Disk

8. Be sure to name the file and select the radio button "MP3" - Click Export

You have successfully created your first MP3 file!
